Take the guesswork out of shade taking with 3D

"It's a Godsend, I couldn't manage without it"

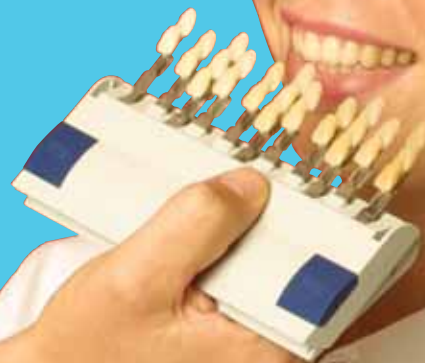

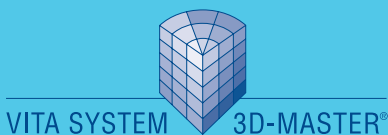

More good news for the Vitapan 3D Master Shade Guide System from Panadent.

"It's a Godsend, I couldn't manage without it" reports Kam Patel, a practitioner from Bandlish Dental Surgery, Gypsy Hill, South London, during a recent Royal College of Physicians seminar. Her technician Graham Osborn of Osborn Dental Ceramics, Petts Wood, Kent, also commented:

"Having used the Vitapan 3D Master Shade Guide System for almost four years now, an increasing number of my clients are incorporating this system into their standard procedure. It definitely encourages more adventurous shade taking (all shades are NOT A3!) and it certainly provides an increase in accuracy with resultant

less remakes. This is so crucial with such finely tuned NHS/Independent costs."
