

VITABLOCS® by VITA for the CEREC® System by Sirona

Sirona Dental Systems and VITA Zahnfabrik have been operating in close collaboration in the field of CAD/CAM since 1986. As market leaders in their core areas of competence, the most experienced in the field have joined forces to develop VITABLOCS and CEREC®. By pooling their knowledge and resources, VITA and Sirona lead the way for the future of dentistry.

The Sirona CEREC® CAD/CAM System offers you the perfect processing of VITABLOCS (Mark II, ESTHETIC LINE, TriLuxe) at the highest level of expertise. The CEREC method combines the adhesive technique with the fastest method possible to date, of manufacturing direct chairside anterior and posterior all-ceramic inlays, onlays, partial crowns, veneers and crowns out of VITABLOCS.

The results are defect-free, biocompatible, metal-free tooth coloured restorations made of high-quality, long lasting ceramic. The decisive advantage of VITABLOCS is that the restorations can be seated immediately after the milling procedure - there is no need for subsequent firing. Dentists value the good polishing features of VITABLOCS and their excellent, enamel-like wear characteristics.

For great savings and fast ordering - order online at www.vitablocs.com

VITA and Sirona - the perfect match. Two strong partners you can count on for the future of all-ceramic technology.

VITABLOCS® Mark II for CEREC® for the reproduction of bleached teeth

VITABLOCS® TriLuxe Forte for CEREC®

NEW

NEW FRESH® CLEAR

Simple - exact - safe - visible

Transparent impression silicone

In contrast to usual impression materials, Fresh Clear is absolutely free of taste and odour. During the whole process of impression taking, the user clearly sees at which points the implants have to be lead through the perforations, particularly when using a transparent impression tray. As this offers the user very precise control of the insertion movement, the perforations can be kept extremely small. Available in 380 ml automix and in 2 x 50 ml double cartridges

380 ml automix 21.5123
2 x 50 ml cartridges with 6 mixing canulas 21.5121
