PANADENT
THE NEXT GENERATION

INNOVATIVE DENTAL PRODUCTS

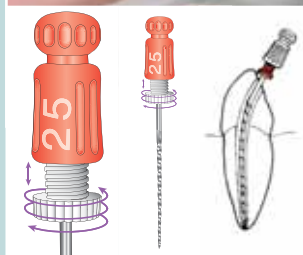

Thomas endodontics

An immensely popular, comprehensive range of quality stainless steel hand and engine instruments of international standard.

The range incorporates the unique non-slipping telescopic stop adjustment with ergonomic chunky handles facilitating effortless use.

Six instruments per pack including H and K files, Reamers, Canal Finders, Superflex Files, Paste Fillers and the popular Dynamatic range for reciprocating handpieces.

Unique telescopic adjustment handle

Minamint

Sugar-free, fresh, minty concentrated mouth rinse.

90ml bottle makes up to 1100 mouth washes.

No delays waiting for tablets to dissolve.

Cleaner, fresher taste.

NEW

Try the NEW vanilla with cinnamon flavour

RXD30/RXF30 Rapid Developer and Fixer

The 30 second, fast picture chairside system.

Ideal for endodontic diagnosis.

'PANA' Chemical stain remover (not shown) also available.

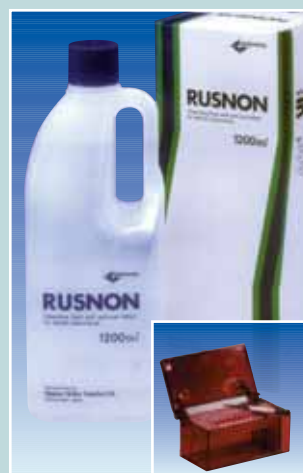

Tri-Sok

Provides almost immediate pain relief from dry/septic sockets following extractions.

Contains aspirin, anaesthetic and antibiotic for analgesia, anti-inflammatory and infection control.

Rusnon/D7 Endo Box

DOES EXACTLY WHAT IT SAYS ON THE BOTTLE - STOPS RUST!

"PRE-STERILISATION CLEANING. This is probably the most important step in the decontamination process..."

BDA - Infection Control in Dentistry. Workshop Four - Decontamination & Disinfection. Dr M. Fulford, BDS, DGDP, FIBMS.

For instrument cleaning and sanitising (contains chlorohexidine). Provides protection from corrosion and rust.

1.2 litres, neutral aroma, makes up to 2.4 litres, and is deal for use in the D7 instrument storage box.

Omnisan Plus

Cleans and sanitizes aspirator, spittoon and sink assemblies.

60 tablets per tub - full tub makes up to 60 litres.

Effective against micro-organisms (inc. HBV/HIV) in just four minutes.

Contains rust retarder.

HurriSeal

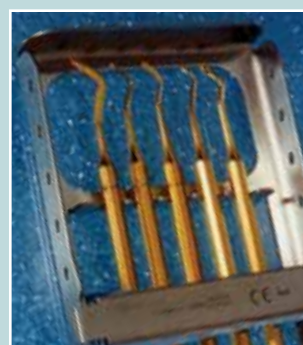

Desensitizer without glutaraldehyde.

Universal uses: Before and after scaling, under veneers, inlays, crowns, onlays, amalgams, composite resins, before and after tooth whitening. HurriSeal is an aqueous solution that should always be used after etching and before priming.

Patented, one step, soft-tissue friendly solution for sensitivity.

A superb wetting agent for dentine bonding procedures with up to 200 applications from 1 x 12ml bottle.

Midas instruments

Gold coloured stainless steel hand instruments with long term coating titanium nitrite.

Ultra smooth surface and harder than stainless steel.

Ideal for placing, packing and carving composite materials which are maybe tacky to use with conventional instruments.

Fully autoclaveable with no peeling or flaking.

Bio-Art GKT 4000N Professional

Reliable and easy to use semi-adjustable articulator.

Large interframe space for easy working.

Robust face-bow.

Transfer jig system.

All metal frame.

Magnetic mounting plates with optional adjustable metallic incisal table.

Comes with handy carry case, exceptional value for money. Developed in collaboration with Guy's, King's and St Thomas.

Dialite 'Color'

Provides consistent, balanced lighting source for precise colour matching.

Unique 'tuning fork' design for natural light showering of teeth.

Two flicker-free fluorescent 9 watt lamps with separate switches with a 5,500 Kelvin daylight output.

Perfect for dentists concerned with ultimate aesthetic colour communication or when natural daylight is restricted.

Giant Jaws

Teaching/demonstration model.

Popular patient education tool easily demonstrates techniques for brushing, articulation etc.

Super Diglaze and Compoglaze

Sub-micron diamond polishing pastes for reglazing/polishing intra-orally porcelain and composite/resin restorations.

30 second 'lab-type' intraoral finish.

Gutta Percha and Absorbent Paper Points

GP: 6 vials (34 points each) = 204 points per box.

PP: 6 vials (20 points each) = 120 points per box.

Colour coded for size.

NEW - now available in sizes 04 and 06 taper.

SUTURES

Panadent PTFE Sutures

Easier insertion and removal with reduced friction - more comfortable for the patient and saves surgery time. (Anaesthesia less likely to be required during removal).

Quicker clotting of the needle wound.

Less plaque and food debris adhesion, therefore reduced infection risk to patient especially if there is a delay in removal.

Conventional suture techniques apply.

White in colour for a more pleasing appearance.

3.0 size in half or eighth circle needle options.

ORAL SURGERY/ IMPLANTOLOGY

Cytoplast Regentex

The new generation Tefgen (nano resorbable PTFE membrane) assists wound healing in oral surgery/ implantology, and carries these additional features:

Even easier to remove after healing.

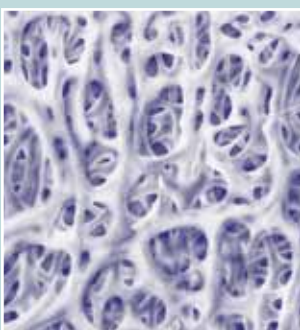

Stretches in all directions.

Can be secured with tacks or bone screws.

NEW

Soon to be launched in a resorbable format.

BioResorb

Bone replacement material.

Pure beta-tricalciumphosphate.

Non-bovine formula.
