A comprehensive range of
prosthetic products from Panadent

Excellence and
innovation for the
dental technician
and dentist

PANADENT
THE NEXT GENERATION

PROSTHETIC PRODUCTS & HARDWARE

Laborsil silicone putty

- ✦ Laborsil 90 (90 ShoreA hardness) or Laborsil 70 (70 shoreA hardness)
- ✦ For use on matrices (completion of model cast works and repairs), break

repairs, blocking undercuts etc.

- ✦ Economically priced - very good detail definition
- ✦ Non-sticky mouldable consistency
- ✦ Long preparation time with short setting time
- ✦ No deforming (recovery from deformation >99%)

Zerosil Soft

- ✦ Addition cured silicone impression material with 'alginate like' handling properties
- ✦ Ideal for prosthetic use

- ✦ Mucostatic - records soft tissue
- ✦ Increased dimensional stability
- ✦ May be disinfected without loss of information
- ✦ Colour coded mixing, with 50/50 mixing ratio

Castdon

Complete and accurate system for production of full and partial dentures using the pouring technique. Many uses within the pressing technique, completions, relinings, repairs, supplements etc.

- ✦ Low residual monimer
- ✦ Colour stable

- ✦ No distortion from heat – accurate fitting

Denture Art - custom gingiva

- ✦ Provides an innovative approach to custom gingiva for dentures
- ✦ Base resin and intense colours allow unlimited freedom to custom design

the gingiva of denture work, undisturbed by injected acrylic

- ✦ Easy to use material - a must for private denture work
- ✦ New course available

Genit-L

Set of 4 application syringes of 2.5g each and 8 dosage tips, light-polymerising blocking-out resin with an optimal viscosity for rational and clean processing. The

spectral area required for the polymerisation is between 300 and 500 nm. It is possible to cure strengths of up to 2mm in one working step. Colour: violet-transparent.

Drufosoft

of laboratory laminated mouthguards using Drewe Drufosoft thermoforming blanks.

Drewe mouthguards and forming machines have been at the leading edge of this market for years.

Signature mouthguards combine unique mouthguard materials from Drewe, with Australian design and technique to produce a range

Lightpaint-on

Kit contains: Set of 12 colours, brushes, surface lacquer and detailed working instructions.

Light-curing colours for the colourisation of resin dentures, teeth and veneers. The set is completed by three gingiva colours, providing the user with extremely authentic characterisations, and the creative possibilities are unlimited. The Lightpaint-on Set is presented in a new layout. Colours by K. Mütterthies.

BioBleach

A full bleaching programme for the dentist and technician.

BioBleach thermoforming guards provide the base for chairside bleaching treatment and home bleaching. Used together with Drufolen W or Cenit L light curing resin for a spacer for the bleaching gel, the Drewe BioBleach programme forms the highest quality bleaching procedure.

Light cured special tray material

Lightplast quality with economic pricing.

Easy to use Light Curing Trays offer good surface coverage, excellent adaptability without stretching and reduced stickiness.

Available with lacquer for excellent polishing

Polymax-5 Heat curing unit

- ✦ Hardwearing and reliable. Holds 5 flasks
- ✦ Thermostatic temperature control to 95°C
- ✦ Automatic lid sealing system
- ✦ Will take a full articulator

Drufomat-TE Thermoforming unit

- ✦ New moulded shape with integrated timer
- ✦ Instant infrared heating element
- ✦ Hydroflask attachment (optional extra)

- ✦ Electronic timer with 6 options and acoustic control
- ✦ 5 year guarantee

Labormat SD Boiling-out unit

- ✦ Large, robust boiling-out unit for 12 flasks
- ✦ Robust construction made of high-grade steel
- ✦ Hand spray nozzle

- ✦ Suitable for processing in boiling water, e.g. polymerisation

'SD' has a practical sliding lid, temperature control by thermostat, spraying time adjustment, instantaneous button for boiling-out, drain and collecting tank for waste water. The housing is made of thermo-lacquered steel. Also available in a table top model the 'TH'.

BioArt articulator

The Bio-Art 'GKT' 400 Professional provides a simple, fast and easy way of recording your patient's jaw relationship.

Invaluable for all fixed and removable prostheses.

Simple, colour coded system with step by step instructions for fast track use.

Complete with two transfer jigs, magnetic mounts and easy to use face bow in a smart carry case.

Schick micromotors

- ✦ Speeds from 1,000 - 50,000rpm (fixed at 40,000 on C1 and C2)
- ✦ Optional cruise control
- ✦ Three control options

- ✦ Unique dust free bearing housing (C3 only)

Vita 3D shade guide

VITA

The most advanced and logical shade taking system in the world based on global tooth colour analysis provides a broader range of dedicated shades to select from plus the opportunity to tailor individual degrees of saturation (chroma) and yellow to red hues as required.

Vita Easyshade - instant shade measuring

VITA

High precision regardless of lighting conditions, whether for porcelain, dentures, direct/indirect composites or all-ceramics.

Incorporates mains powered miniaturised handheld spectrophotometer - instantly

measures a broad range of 97 shades, including 3 bleached, 26 Vitapan System 3D Master and 16 Vitapan Classical. Narrow tip allows for measuring shades anywhere in the mouth. Unit is equipped with USB and serial ports for expanded use and upgrades. Precise, objective shade matching eliminates sometimes costly and annoying remakes.

Vita Bleaching Shade Tabs

VITA

These 3 tabs follow the same logical order of the 26 "natural" shades of the 3D-Master® system. Dentist and patient can now select a "super white" shade and have a reference point for initial as well as subsequent treatments.

Futar D Fast

- ✦ Fast bite registration material with minimal elasticity
- ✦ Sets rock hard with minimum distortion in only 45 secs
- ✦ Thixotropic (i.e. flows well but does not 'slump' or run into deep fissures)

Mucopren Soft

- ✦ Permanent soft chairside or laboratory relined material in chairside delivery format.
- ✦ Working and setting time 5.5 mins in total.

- ✦ Silicone and sealant cartridge delivery - easily dispensed
- ✦ Good colour match to acrylic, durable, long term bond
- ✦ Economical - 6-7 dentures per cartridge
- ✦ Additions can be made to silicone after 1st construction
- ✦ Standard rotary instruments needed for margins. Easily and immediately trimmable after curing

Physiodens teeth

VITA

Individually tailored to match your patients personal characteristics

5 layer resin build up for superb lifelike aesthetics and function

Perfect for implant cylinders, complete dentures, partials and

long term temporary prostheses - especially chrome work where even in thin section ugly metal work is masked with retained tooth aesthetics, shade match and translucency

Wide cervical margins minimise unsightly traditional 'black triangles'. Long mould designs to accommodate Class 5 recession

Certificate of origin card records tooth shade and mould for patient peace of mind. All Vita 3D shades stocked.

Triostat teeth

VITA

✦ Can be used in 3D shades or converted for classical shades

✦ Tri-layer construction for natural appearance

✦ Natural hand made moulds

✦ Wide choice of moulds in 4 groups, Anatomical posterior occlusion

✦ Strong and easy trim

✦ Bonds well to all types of PMMA denture base

✦ Supplied in 15 of the Vita 3D Mastershades: 1M1, 2M1, 2M2, 2M3, 3L1.5, 3L2.5, 3M1, 3M2, 3M3, 3R1.5, 3R2.5, 4M14M2, 4M3, 5M2

Vitapan teeth

VITA

Ergonomic, simple, quick and rational, Vitapan Anterior and Posterior teeth demonstrate outstanding physical properties.

The impact resistance and innate elasticity of the material creates a tooth that can be ground without chipping.

There is exceptional shade accuracy even after cutting out the backs to make space for metal retention posts. The Vitapan Tooth also demonstrates high polishability with no porosities. Plus individual characterizations and a degree of translucency, opalescence and fluorescence that corresponds to natural teeth.
