

Easyshade - VITA's digital answer to shade taking in seconds

Fast and accurate with no more guessing.

The VITA Easyshade instantly measures shades with high precision regardless of lighting conditions, whether considering porcelain, dentures, direct/indirect composites or all-ceramics.

The VITA Easyshade incorporates a mains powered miniaturised handheld spectrophotometer which is capable of instantly measuring a broad range of 97 shades, including 3 bleached, 26 Vitapan System 3D Master and 16 Vitapan Classical. Portable, lightweight with easy to read touch screen and is also supplied with a printer/download facility to enable prescriptions to be printed off quickly and easily.

Easyshade - interpolated Vita 3D Mastershades

The 29 Vita 3D-Master shades are shown in bold in the following tables. Also shown are 52 interpolated shades that can only be matched by using Vita 3D-Master porcelains which are mixed appropriately and equally.

Easyshade measures teeth and restorations to the nearest 3D-Master interpolated shade. With the addition of the Vita Classical 16 shades, which cannot be interpolated, a total of 97 shades may be selected by Easyshade and displayed in seconds.
